Chinese Railway Timetable - April 2004 Edition

SUPPLEMENT No. 5

Introduction

This supplement is designed to be used in conjunction with the April 2004 edition of my Chinese Railway Timetable; it completely supersedes Supplement No. 4. Whilst Part 1 is probably incomprehensible without a base timetable to refer to, the remainder of the supplement contains stand-alone information about newly introduced trains. There is also a complete revision of Table 20T# which shows the intensive service of express trains between Guangzhou and Shenzhen.

Information in this supplement is based on the October 2006 edition of the CRPH timetable. My April 2004 timetable and this supplement read together show the service applicable until mid-April 2007, at which point I plan to produce a new edition of my timetable based on the April 2007 CRPH timetable. This will incorporate the major changes (postponed from October 2006) to be introduced under the 'Sixth National Railway Speed-up Program'; publication of the new edition is planned for June 2007. Further information about my timetables can be found on my website - link below.

The supplement consists of 22 pages and is arranged as follows:

- Part 1 [pages 3-11] - Lists altered and discontinued trains (ordered by train number)
- Part 2 [pages 12-15] - Lists new trains running within one table (ordered by table number, then by train number)
- Part 3 [pages 16-18] - Lists new trains running within more than one table (ordered by train number). These trains are cross referenced from the appropriate tables in Part 1
- Table 15 (extract) [page 19] - Shows 'local' T trains between Nanjing and Shanghai, cross referenced from Part 1 as appropriate.
- Table 15U [page 20] - Shows the complete service on the newly opened network of lines in the Taizhou (Jiangsu Province) area.
- Table 20T# [page 21] - Shows the complete service of express trains between Guangzhou and Shenzhen. The information in Table 20T (as amended by this supplement) remains valid for all trains not shown in Table 20T#.
- Table 41B [page 22] - Shows the complete service on the newly opened line to Lhasa (Tibet)

New lines and station renamings

A list of lines which were not shown in my April 2004 timetable, but for which I now have information, is on page 11 at the end of Part 1.

Hunjiang (Table 9) has been renamed Baishanishi

Jinggangshan (Table 43(S)) has been renamed Taihe.

Laizhou (Table 19) was renamed Nanping Bei, but appears to have reverted to its original name.

Guokeng (Table 19) has been renamed Zhangzhou Dong.

Rizhao Xi (Table 15N) has been renamed Rizhao [5km west of the now closed 'old' Rizhao]

Shanghai Nan station has re-opened after reconstruction - many (but not all) trains to the south west now arrive/depart there.

Beijing Nan station is closed for reconstruction - trains have been diverted to other Beijing stations.

How to use this supplement

Use the April 2004 edition of my Chinese Railway Timetable to plan your itinerary, consulting Part 2 to find any new trains which may be of use. Make a list of the numbers of all trains in which you are interested and check the list (except new trains) against Part 1.

A train is listed in Part 1 if either departure time at origin or arrival time at destination are outside the range 5 minutes earlier to 15 minutes later than as shown in my April 2004 full timetable. This means that if 'your' train is not listed in Part 1 the times shown before will be within this range, however allowance must be made for the possibility that the train might depart from intermediate stations more than 5 minutes earlier. The departure time shown on your ticket (see page P14 of my timetable) will be correct.

If 'your' train is listed in Part 1 take note of the information provided. If you travel to or from an intermediate station you may need to interpolate from this information.

Times are shown as in the following examples:

08a57 - arrival time

12 34 - departure time

16 06/15 - arrival/departure time at intermediate station

If a train is shown as discontinued you may find a suitable alternative in Part 2. In some cases trains shown as discontinued may still run - it is always worth enquiring locally; please let me know of any such cases you find.

The 'CRPH Page' references in Parts 2 & 3 relate to the October 2006 CRPH Timetable.

If you would like to confirm specific intermediate train times please feel free to contact me. I am happy to provide this service for registered timetable purchasers and will assist others as far as practicable. I hope you find the supplement useful - feedback is welcome as always.

SOURCE: October 2006 CRPH timetable. Services are subject to alteration due to upgrading works.

All trains operate daily except those marked \$ which run only during holiday periods (for dates enquire locally).

Note: % - Trains T353 & T354 run beyond Guangzhou from/to Shaoguan (Table 20(S) in my full timetable).

TRAIN TYPES: X2000 - Xinshisu (New Speed) 200km/h tilting train; DJJ - Lanjian (Blue Arrow) 200km/h express train; Exp - 160km/h Locomotive hauled express train.

All trains are air conditioned, and have soft seat accommodation only (except trains shown as Exp *, which have hard seat accommodation only).

FARES: Fares shown above are one-way adult fares, in RMB (Yuan), between Guangzhou/Guangzhou Dong and Shenzhen. Lower fares (enquire locally for details) apply for intermediate journeys.

Frequent train services of the Kowloon-Canton Railway operate between various stations in Hong Kong and Lo Wu. Further details at <http://www.kcr.com/eng/services/services/index.asp>

Between Lo Wu and Shenzhen passengers pass through Immigration and Customs controls on foot.

NOTES: See tables below for days of operation of trains marked #.
 All trains are air conditioned and pressurised
 This table shows the complete service between Geermu and Lhasa. East of Geermu only through trains are shown.
 For the complete service east of Geermu see my full Chinese Railway Timetable under the table numbers shown above.
 Distances shown are from Geermu and altitudes are in metres above sea level.
 A black bar next to the km/altitude column indicates that train numbers are opposite (odd/even) over this section to those for the table.
